With great joy and satisfaction Tecnofom announces a new, important award:

Hymer Duo Car won the **European Innovation Award** in the Concept Van category!

Every year the main European magazines of the sector reward innovative solutions, products and concepts with the European Innovation Award.

The international jury evaluates the products of caravan and camper manufacturers in a total of 13 categories and rewards them at the CMT in Stuttgart.

The **Hymer DuoCar** convinces with a spatial separation from shower and toilet to make a parallel use possible. The spacious bathroom is located in the rear of the vehicle and is accessible from the inside and outside. The large double bed is two meters in length and is fully legged without any restrictions by walls or furniture. That can be folded easily into a couch which offers more space inside during the day. Also it is no longer necessary to put Sheets on the bed at all, since the bed linen disappears in the folding construction. This creates a spacious living room with a two-meter-long sofa which forms a cozy lounge area in combination with the two comfortable driver's seats.

After Horizon® and the RV Industry Award 2017, once again Tecnofom shows its innovative expertise on an international level, in terms of quality and design.

Another deserved success thanks to the commitment and the passion of the excellent Team Tecnofom!
